Code : C++ 14

```cpp
#include <bits/stdc++.h>
using namespace std;

int main() {
    // your code goes here
    int t;
    cin>>t;
    while(t>0){
        int n;
        cin>>n;
        vector<int>v(1001,0);
        int k;
        for(int i=0;i<n;i++){
            cin>>k;
            v[k]++;
        }
        int mx=*max_element(v.begin(),v.end());
        cout<<n-mx<<endl;
        t--;
    }
    return 0;
}
```
